2. It was agreed that 7 June 1965 was to be established as the delivery date to LAC, Van Nuys, California, for Article 381. This date has informally been agreed to by [REDACTED] of LAC who indicated that the 7 June input date at the factory would fit very nicely in their production schedule as Article 383 was due out of the aircraft jigs the week of 14 June. The extra week of work available on Article 381 was to be used to disassemble and prepare the aircraft for mounting in the jigs.
